

CEE-Sure™ Cerebral Spinal Fluid (CSF) Collection Tube for cfNA and CTCs

The capture, isolation and analysis of tumor material in cerebral spinal fluid (CSF) is critical in research settings to assess central nervous systems (CNS) infections, neurological disease, and CNS cancers—primary tumors or metastatic disease.

The CEE-Sure™ CSF Collection Tubes utilizes patented technology to effectively preserve whole cells, such as white blood cells and circulating tumor cells (CTCs), and cell free nucleic acid (cfNA). cfNA includes both circulating tumor DNA (ctDNA) and circulating tumor RNA (ctRNA).

The CEE-Sure™ CSF Collection Tubes prevent cell coagulation and preserve cells from lysing due to age or transport conditions. In addition, it improves cell capture in a microchannel, inhibiting cell clumping and clogging of microfluidic devices and enhances the capture of cfDNA and cfRNA for next generation sequencing, PCR and other technology platforms. The CEE-Sure™ CSF Collection Tube also allows for room temperature shipment of nucleated cell isolation and cfNA detection.

Advantages

- Preservative stabilizes cellular and genetic contents including cfNA and CTCs
- Ambient temperature stability—no cold pack or ice necessary for shipping
- Patented transport media
- Efficacy in thousands of tests as part of Laboratory Developed Tests analyzing both cfNA and CTCs

Specifications

Manufacturing	In accordance with ISO 9001
Tube Volume	5.0 mL nominal liquid capacity
Tube Type	Plastic
Shelf Life	90 days
Storage Temperature	18°C – 25°C
Shipping Temperature	15°C – 30°C
Stability	CTCs: Up to 4 days
	Nucleic Acid: Up to 8 days

Product	Product Number	Pack Size
CEE-Sure™ CSF Collection Tubes, RUO, Plastic	BIOC-CSF-2365	1 box of 100 tubes, 10 boxes of 100 tubes (1000 tubes total)

For more information about the CEE-Sure™ Cerebral Spinal Fluid Collection Tube, contact your local Biocept Laboratory Representative or **Customer Service** at **888.332.7729** or **customerservice@biocept.com**.

Collection Tubes Are For Research Use Only. Not for use in diagnostic procedures.
